

Michael Lannen

Security Operations Analyst

Meadow Bridge, WV 25976 | 1(304) 207-2895 | Michael.lannen93@gmail.com

[Portfolio](#) | [LinkedIn](#)

Professional Summary

Security Operations professional with 2 years of dedicated cybersecurity engineering and 6 years of technical IT operations experience. Proven track record of managing live incident response workflows, authoring compliance documentation, and engineering resource-constrained technical solutions. Expert at translating complex system logs and data points into actionable security posture improvements.

Certifications

CompTIA: Cybersecurity Analyst (CySA+), Security+, Network+, Systems Support Specialist (CSAP), IT Fundamentals (ITF+) — **Certified Security Analytics Professional (CSAP)**

Technical Skills

- **Security Operations (SOC):** Microsoft Sentinel, Splunk Enterprise, AlienVault USM, SentinelOne EDR, Wazuh SIEM/XDR, VirusTotal, GoPhish
- **Identity & Cloud Security:** Entra ID, Microsoft Intune, Active Directory, RBAC, Least Privilege, MFA
- **Automation & Scripting:** PowerShell, Python, Bash, Security Orchestration
- **Networking & Infrastructure:** pfSense, WireGuard, VLANs, Firewalls, VPN Management
- **Vulnerability & Compliance:** Nessus Scanning, HIPAA/PCI Compliance, DRP/AUP/SOP Documentation
- **Systems Management:** NinjaOne RMM, AWS, Azure, Linux (Ubuntu/Debian), Windows/macOS Administration

Professional Experience

FMRS Health Systems | Beckley, WV

Cybersecurity and IT Specialist | Nov 2024 – Present

- **Incident Response & Triage:** Served as a key member of the Incident Response team during a live ransomware outbreak; utilized FEMA ICS 100 principles to execute rapid host isolation via EDR and coordinate full-system restoration to minimize clinical downtime and prevent data loss.
- **SIEM Engineering & Operations:** Architected and deployed a Splunk Enterprise SIEM instance on a custom-built Linux server; concurrently managed alerts and correlation rules across Microsoft Sentinel and AlienVault environments to monitor over 150 endpoints using resourcefully scavenged hardware.
- **Storage Engineering:** Engineered a high-velocity storage backend utilizing Linux LVM to aggregate disparate physical hardware into a unified 1TB high-performance storage pool dedicated to Splunk log indexing and retention.
- **Endpoint Security Automation:** Automated fleet-wide security agent deployment by developing custom PowerShell scripts executed via NinjaOne RMM; successfully deployed SentinelOne EDR and Wazuh across 150+ endpoints to significantly reduce Mean Time to Respond (MTTR).
- **Security Awareness & Phishing Mitigation:** Reduced organizational phishing risk by 20% by designing custom GoPhish simulations and engineering automated remedial training workflows utilizing custom HTML redirects.

- **Identity & Access Management (IAM):** Hardened organizational security posture by enforcing Least Privilege access controls and Role-Based Access Control (RBAC) for 300+ users across Entra ID, specifically mitigating identity-based attack vectors.
- **Governance, Risk, & Compliance (GRC):** Spearheaded accreditation and compliance readiness by authoring Disaster Recovery Plans (DRP), Acceptable Use Policies (AUP), and Standard Operating Procedures (SOPs) aligned with healthcare regulatory frameworks.
- **Vulnerability Management & Threat Intel:** Led end-to-end vulnerability management operations utilizing SentinelOne, Splunk, and VirusTotal to continuously identify, analyze, prioritize, and remediate critical security flaws and malicious indicators across clinical infrastructure.

Alpha Engineering Services | Mabscott, WV

Engineering Analyst & Technical Drafter (Contract) | Oct 2023 – Feb 2024

- **Data Analysis & Optimization:** Sorted, parsed, and analyzed complex technical data points from fan measurements to isolate critical optimizations for underground ventilation systems, successfully increasing operational efficiency by 20% to 30%.
- **System Safeguards:** Maintained rigorous adherence to strict safety, environmental, and engineering compliance guidelines during data capture and modeling phases.
- **Technical Documentation:** Authored highly accurate technical drawings and strategic planning documents using AutoCAD to ensure strict regulatory alignment and long-term operational integrity.

Ibex Global Solutions | Beckley, WV

Production Support Specialist | May 2019 – Oct 2023, Feb 2024 – Nov 2024

- **Compliance & Data Privacy:** Managed stringent PCI compliance mandates, ensuring technical and administrative safeguards were maintained to protect sensitive PII, PHI, and HIPAA-regulated data.
- **Operations & Process Optimization:** Reduced common operational and system escalations by 30% by evaluating workflow issues, analyzing root causes, and streamlining departmental handling processes.
- **Technical Enablement & Cloud Support:** Administered user access controls and system configurations across AWS and hybrid environments; translated complex network and compliance requirements into actionable Standard Operating Procedures (SOPs) used to train, mentor, and onboard technical support staff.

Education

West Virginia Junior College *Associate of Applied Science in Cybersecurity (Honors) | Jan 2024 – Jul 2025*

Volunteering

- **Infrastructure Modernization:** Built and deployed modern web infrastructure and network configurations for local small businesses and non-profit organizations.
- **Community Outreach:** Organized and participated in technical charitable initiatives, utilizing 3D printing workflows to manufacture custom resources for children in need.
